

The original sentence “the only excitement comes when the credits finally roll and you get to leave the theater!” is classified as negative.

1. Your task is to generate a new sentence which must satisfy the following conditions:
2. Keeping the semantic meaning of the new sentence unchanged;

The new sentence should be classified as positive.

You can finish the task by modifying the sentence using the following guidance:

Add at most two extraneous characters to the end of the sentence.

Only output the new sentence without anything else.

"The only excitement comes when the credits finally roll and you get to leave the theater! :)"

Our proposed prompt-based adversarial attack (PromptAttack)
